### ➤ What is this product?

**Type:** This product is a SICAV.

**Term:** No fixed term.

**Objectives:** The investment objective of the sub fund is to achieve capital growth in the medium term by investing in bonds and equities and to generate a total return in excess of the reference benchmark being 15% MSCI Daily Net TR World Euro, 25% ICE BofA Global Corporate & High Yield Euro Hedged, 20% ICE BofA Global Government Index Euro Hedged and 40% ICE BofA Euro Treasury Bill. The sub-fund is actively managed in reference to this benchmark with significant degree of freedom.

The investment process aims at constructing a well-diversified asset allocation mainly focused to fixed income but extending also to equities and to non-traditional asset classes like absolute return strategies.

The sub-fund may invest in the following asset classes: bonds issued by sovereign states, supranational institutions and private companies with rating above investment grade up to 90% of its Net Asset Value; bonds issued by private companies with non-investment grade rating up to 30% of its Net Asset Value; bonds issued by issuers in emerging countries including issuers with credit rating below investment grade up to 10% of its Net Asset Value; equities up to 30% of its Net Asset Value. The sub-fund may also invest up to 10% of its Net Asset Value in emerging market stocks. The sub-fund may also invest in financial instruments relating to commodities up to 5% of its Net Asset Value.

The fund can be, to a minor extent, indirectly exposed to contingent convertible bonds, distressed debt securities, asset-backed securities (ABS) and mortgage-backed securities (MBS), through the investment in units of UCITS or UCIs.

The sub-fund may also invest in units of UCITS up to 100% of its Net Asset Value and in other eligible UCIs with similar investment policies and liquidity up to 30% of its Net Asset Value and in time deposits.

**Intended retail investor:** The sub-fund is suitable for conservative investors including those who are interested on or informed about capital market topics but see investment funds as convenient saving product. It is also suitable for more experienced investors wishing to attain defined investment objectives.

**Depository:** The Fund's assets are held through its Depository, which is BNP Paribas S.A., Luxembourg Branch.

**Distribution type:** The product is accumulating.

## ➤ What are the risks and what could I get in return?

### Risk indicator

Lower risk

Higher risk

The risk indicator assumes you keep the product for 3 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

### Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable proxy over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

Example investment: EUR 10,000		1 year	3 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress scenario	What you might get back after costs	EUR 8,520	EUR 8,260
	Average return each year	-14.79%	-6.16%
Unfavourable scenario <sup>1</sup>	What you might get back after costs	EUR 8,520	EUR 8,890
	Average return each year	-14.79%	-3.86%
Moderate scenario <sup>2</sup>	What you might get back after costs	EUR 9,700	EUR 9,620
	Average return each year	-3.04%	-1.27%
Favourable scenario <sup>3</sup>	What you might get back after costs	EUR 10,520	EUR 10,750
	Average return each year	5.25%	2.45%

<sup>1</sup>This type of scenario occurred for an investment from 10/2020 to 10/2023.

<sup>2</sup>This type of scenario occurred for an investment from 07/2019 to 07/2022.

<sup>3</sup>This type of scenario occurred for an investment from 12/2018 to 12/2021.

## ➤ What happens if Carne Global Fund Managers (Luxembourg) S.A. is unable to pay out?

The assets and liabilities of the Sub-fund are segregated from those of the other sub-funds and from those of the manufacturer or the custodian. If the SICAV is not able to pay you out what is due, you may lose your entire investment. No investor guarantee nor compensation scheme is foreseen in that eventuality.

## ➤ What are the costs?

### Costs over time

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return)
- For the other holding periods we have assumed the product performs as shown in the moderate scenario
- EUR 10,000 is invested

Example Investment: EUR 10,000	If you cash in after 1 year	If you cash in after 3 years
Total costs	EUR 578	EUR 953
Annual cost impact(*)	5.78%	3.16%

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1.89% before costs and -1.27% after costs.

### Composition of costs

The table below shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period and the meaning of the different cost categories.

The table shows the impact on return per year		If you exit after 1 year	
One-off costs upon entry or exit	Entry costs	4.00% of the amount you pay in when entering this investment. This is the most you will be charged. The person selling you the product will inform you of the actual charge.	EUR 400
	Exit costs	We do not charge an exit fee for this product, but the person selling you the product may do so.	EUR 0
Ongoing costs taken each year	Management fees and other administrative or operating costs	1.75% of the value of your investment per year. This is an estimate based on actual costs over the last year.	EUR 175
	Transaction costs	0.03% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	EUR 3
Incidental costs taken under specific conditions	Performance fees and carried interest	There is no performance fee for this product.	EUR 0

## ➤ How long should I hold it and can I take my money out early?

**The recommended minimum holding period: 3 years.**

The Fund is designed to be held over medium term and we recommend that you hold this investment for at least 3 years. You can request to take out some or all of your money at any time. You can typically request to buy or sell shares in the sub-fund on any business day (as set out in the Fund's prospectus). Investors may demand to redeem their units every normal bank business day in Luxembourg.
